Summary

Tech enthusiast, entrepreneur, and cloud computing aficionado. I push the boundaries of tech with a flair for humor and a passion for innovation

Experience

Cloud Computing Co-Lead

GDSC SMIT

Aug 2022 - Present (9 months)

As the leader of the Google Developer Student Club (GDSC) cloud computing team in my college, I was responsible for spearheading innovative projects and initiatives related to cloud computing technologies. From organizing workshops and coding challenges to collaborating with fellow students and industry experts.

Co-Founder

Gradure

Jun 2022 - Present (11 months)

- Developed and implemented operational strategies and processes to optimize efficiency and productivity.
- Managed financial operations, including budgeting, financial analysis, and reporting.
- Developed and maintained relationships with external partners, vendors, and stakeholders.
- Contributed to strategic planning and decision-making to drive long-term growth and expansion.
- Played a key role in market research, competitive analysis, and identifying new business opportunities.

Marketing Intern

Plena Finance

Apr 2022 - Dec 2022 (9 months)

- Coordinate and support marketing initiatives and campaigns & communications among other program tasks
- Assist in various marketing activities across channels, such as community engagement, affiliates, social media, etc.
- Monitor marketing campaign progress and results using data analysis and user feedback to ensure ever-improving efficacy and user experience

-Assist in the tracking and reporting of key metrics and objectives

-Write educational content, including but not limited to blog posts, emails, video scripts, promotional articles, and presentations

-Create and maintain data in Excel

Blockchain Dev Intern

RanchiMall

Dec 2021 - Jul 2022 (8 months)

-I was responsible for creating and managing Docker containers to enable efficient and scalable deployment of applications. This involved creating Docker images, managing containerized applications, and optimizing Docker configurations for performance.

-With Google Cloud Platform (GCP), I contributed to the development and deployment of cloud-based applications and services. This included setting up virtual machines, configuring networking components, and working with cloud storage and databases. I also gained proficiency in using GCP tools such as Compute Engine, App Engine, and Cloud Storage.

-I developed Python scripts and applications for various use cases, including data processing, automation, and web development. This involved writing Python code, debugging and troubleshooting, and implementing best practices for code quality and performance.

Education

Sikkim Manipal Institute of Technology

Bachelor of Technology - BTech, Information Technology

Sep 2021 - 2025

Central Board of Secondary Education

12th Boards, Boards

2007 - 2021

Licenses & Certifications

Fundamentals of Digital Marketing - Google

GNQ 5K6 GJ9

Introduction to blockchain technologies - INSEAD

Programming for Everybody - University of Michigan

Skills

Django • Back-End Web Development • Cloud Computing • DevOps • Anaconda • Docker •
Google Cloud Platform (GCP) • Mongoose Web Server • Recruiting • Lead Generation

Honors & Awards

Inter House science Quiz - Scottish Public school

Jul 2015

Alchemic National Space Olympiad - Alchemic Skills

Feb 2016
